PROJECT DESCRIPTION

Name of Project:

Rojgar mitra

Module I

This particular system provides

Job Posting
Job Searching
Candidate Searching
Candidate registration

Problem Statement

In market daily many jobs create but due to lack of connection job seeeker can not approach them and lost opportunity.

Objective

Job Protal is the site which provides the managent of jobs submitted cadidates can apply for the jobs.

Existing System

such system existing but for such a locally connect people for getting opportunities not exist .

Disadvantages:

1. Huge competition and lack of time
2. No support for students and job seeeker.

Portal system:

A simple website via which the users can enroll for the update cause and easy manage their account and also request for the support for others from the same account, just in a click. .

Advantages:

1. Improved Communication Results
2. Improved Data Integration
3. Getting job locally.
4. Easy to apply .
5. Easy access
